PROJECTS

JAN 23 - MAR 23

E-MANAGER - FINEST EVENT ORGANISERS SYSTEM

This project we make a system better than the market. Actually in the market lots of similar tools are available for **event management** specially for college but we added a lot of features in a project. Basically I build a Front-end of the project & They Project based on Android Platform.

FEB 23

NUMSA - SECRET MESSAGE SENDER

In a starting day when I learn Android development they time I get idea to create app to send a secret message for anyone but can't read normal person because they message in a number form. Basic used of application covert **message into numbers** its mean decoding the message.

AUG 22

ASSIMAA - PROVIDE CUSTOM WEB TEMPLATES

After our completion of Industrial Training, I learn from Sumago Info Tech HTML, CSS, JS, BOOTSTRAP & PHP, MYSQL or make a by own-self project to provide a custom **web component & templates**. When I make create this project face lots of problems related to database & other things.

AUG 22

FREEDOM FIGHTERS INFOSITE

They were my first Personal Project in the project whatever technology I made it. With the help of the internet first I learned they apply in projects, within a month they I successfully made this one. About the project have a basic landing page and collection of information they person, Technology used HTML, CSS, JS, BOOTSTRAP, PHP, MYSQL.
